Summary

As a Computer Science graduate from Florida State University, I possess a broad spectrum of technical skills and a keen ability to lead and collaborate effectively. Throughout my academic journey and team-based projects, I've discovered that I possess a natural affinity for leadership and team collaboration. Central to my approach is my extraordinary ability to communicate and serve as a mediator, which has not only streamlined group dynamics but has also often turned team members into friends. My mediation skills excel in harmonizing diverse viewpoints, ensuring that every voice is not just heard, but valued. Through creating this inclusive environment, individuals find commonalities and build relationships based on mutual respect and understanding. My ability to coordinate efforts, set objectives, and facilitate open, effective communication within the team has consistently steered us towards success. Beyond the project tasks, I've made it a priority to foster a supportive and engaging team culture, which I believe is integral to high performance. My talents as a mediator have been pivotal in transforming a group of individuals into a cohesive unit and, more importantly, into a network of friends. The result has been more than just successful projects; it has been the cultivation of lasting friendships. After each project, I've found myself not just with a set of accomplished objectives but a thriving community of close friends. This testament to my interpersonal skills, particularly my aptitude in communication and mediation, is, I believe, just as important as my technical acumen. I'm proud to bring this unique blend of leadership, communication, mediation, and friendship-building skills to every project and professional undertaking.

Education and Training

Florida State University | Tallahassee, FL

Bachelor of Science in Computer Science 3.8 GPA

05/2023

Relevant coursework in:

- Computer Security Fundamentals
- Computer and Network System Administration
- Secure , Parallel, and Distributed Computing with Python
- Operating Systems
- CYBERCRIME FORENSICS
- OPERATING SYSTEMS
- COMP & NET SYS ADMIN
- Binary Linkers in C
- C#
- ADV PROG W/JAVA

Skills

Skills:

C/C++, C#, Swift, Assembly, Java, Python, JavaScript

FrameWorks and Libraries:

- React
- Xcode
- MongoDB
- Sql
- Unix

- React Native
- Next.JS
- Node.JS
- Express
- Apollo
- GraphQL
- JWT,
- BCrypt
- Mongoose
- SwiftUI
- Spritekit
- JQuery
- NET core
- Xamarin

Tools and Platforms:

- Linux
- Shell Scripting
- Git
- Vercel
- Netlify
- Heroku
- Figma
- Imagekit
- CDN

Notable Projects(On Github)

- Functional Operating System C#, January 2022
- Ecommerce App with UI, Client and Server C#, August 2022
- Fully fledged Website with sql database on server in python flask and nginx, November 2022
- Binary Linking in C
